

Tesla Scalar devices are based on the non-Hertzian technologies of Nikola Tesla.

They have been developed as the result of over three decades of research works that have clearly confirmed the accord of our cosmological EDQ (Energy Density Quantifying) model of nature with ancient teachings about the unity of the matter and spirit, the whole cosmos as an expression of conscious, primordial spark that expresses itself in a lawful manner at different levels of existence as a specific vibrational structure in the universal harmony of Unity. Visible or not, nature is an expression of the successive development of the primal and all-pervasive essence. It has turned out that the ancient and eternal truths were discovered by Nikola Tesla in the secrets of natural principles and mechanisms, thus becoming the herald of the modern era, and the one who speaks, using the language of science, about the deepest mysteries of the world, the ones that mystical explorations have eternally craved for.

The unique, reduced, **special K9 EDQ Tesla coil** is at the core of our equipment, designed according to the principles of multi-dimensional resonance and general cosmic harmony that Nikola Tesla copied into his Extra Coil, the most controversial element of his famous "Magnifying Transmitter" from Colorado Springs. This very special coil constitutes a scalar field of non-Hertzian type and generates stationary waves, the discovery of which Nikola Tesla deemed to be the culmination of his work. Our EDQ Model has predicted their existence and experimentally confirmed these waves in our laboratory for Tesla Technologies researches, and we named them **Tesla's waves**. Substantial form of the same object, the carrier of such multidimensional vibrations we called **Teslion**, in view of the fact that it is a stable object on **K9** quantum level, deeper, underneath the last material trace of light (photon K8), and makes these waveforms of subtle energy type very interactive both with the energy and information depths of beings and the living world.

K9 EDQ generates multi-dimensional volumetric vibrations, constituting intelligent scalar fields in space, which emanate directly from the subtle-energy substrate, which Tesla called "active ether", manifesting themselves in the form of harmonic volumetric

oscillations that resemble the breathing. The properties of these intelligentscalar fields are completely analogous to the ancient descriptions of the way of movement of the vital, all-pervasive life energy, Chi and Prana, and are in accord with the modern quantum-informational and biophysical studies that support the traditional approaches to the maintenance and improvement of health and wellbeing of the human spirit.

Tesla Scalar K9 EDQ Generator

This very specific device, using the unique Tesla coil, constitutes a field of subtle vibrations that change the energy structure of the space towards the increased permeance for the subtle energy flows. Harmonization of complex energy fields of scalar type and their alignment with the cosmic

oscillations result in a beneficial influence on all the biostructures.

Qualitative finesses of a scalar field can be achieved by changing the excitation frequency of the coil, either by automatic change from 8 to 12 MHz, or by manual selection of the desired, constant value from the range of 10 to 12MHz. Also, the operating mode can be set so as to enable generation of a conventional EM field of extremely low intensity, modulated with certain frequencies from the Schumann spectrum, which are characteristic of resonant vibrations generated by lightning strikes in the cavity between the ionosphere and the Earth's surfacet, as well as of neurological brain activities. By selecting the frequency of 7 Hz, which is characteristic of the theta brain waves, the state of laid-back, tranquility, and relaxation is stimulated. By changing the modulation of the carrier EM wave to 14 Hz, active states of mind are stimulated, which are characteristic of alpha waves of brain activities.

Special effects are achieved by photonic stimulation of the coil and the constituted ambient field, yielding a pleasant light in combination with a light excitation of the appropriate crystal - the specific frequencies of which can additionally modify the

constituted scalar field. The holistic crystal-therapeutic practice has confirmed that the crystals by their color and structure can be closely correlated with the corresponding energy centers in a man - the chakras, and, therefore, they can improve their functioning. Resonant vibrations establish harmonization of multilayered energy dimensions of beings, which is the necessary precondition for the health of physical systems.

Light Processor K9 EDQ-LP

The Light Processor's entirety composition has resulted from the pooled knowledge of modern Tesla technologies founded on the principles of Nature and axiomatic rules of the ancient peoples in which the values of cosmic constants have been interwoven, as well as the codes of ancient pyramidal and sacral structures as concentrators and amplifiers of subtle energy.

The portable part of the K9 EDQ-LP device, the Pyramidal Resonator is the unique unit that we have named **Active Orgonite**. It creates a strong and multilayered field of clean, volumetric –breathing like-harmonizing oscillations, known as "Purified Chi" energy. Multidimensional and layered effects comes from the smaller, very special K9 EDQ Tesla coil, accommodated inside the pyramidal form, of a strong subtle-energy charge, additionally purified by elements made of corresponding natural resins and crystal structures, such as Rock Crystal at the very top of the resonator, and frankincense, amber, and quartz at the base.

The stable part of the K9 EDQ Light Processor transforms the solar light into the EM energy exciting the helical and dipole elements implemented in the structure of the pyramidal resonator by a slight EM signal of the frequency of 150 MHz (which is analogous to the human DNA structure), activating the mechanism for generating intelligent subtle-energy forms. Additionally, the function of photon excitation by means of the light source at the center of the base of the resonator, is intended not only to create a comfortable visual experience, yet its primary

purpose is to excite certain crystalline resin modules accommodated in the interior of the Active Orgonite Pyramidal Resonator.

Tesla Scalar devices contribute, in an easy, safe, and ecologically efficient way, to the harmonization and maintenance of general harmony of vibrations of man and nature, micro and macro cosmos, matter and spirit. Harmonization of the internal processes is reflected on the vitalization of cell structures, creating the necessary preconditions for clean and effective stimulation of self-regulatory and self-healing potentials of all the biostructures. The field generated by the K9 EDQ-LP coil, by its refined vibrational form, restores the natural conditions to the energy balance disrupted by the modern way of life - creating a safe foundation for a harmonious, healthy, and favorable psychophysical condition.

In the absence of sufficiently sophisticated equipment, subtle, multidimensional energy vibrations can be registered indirectly and visualized in the form of their lower-dimensional projections that highlight some, but not all, the qualitative aspects of a scalar field. On the other hand, conscious intuitive-energy human being directly feels the changes that this field creates.

The Polycontrast Interference Photography (PIP) has shown particularly strong and specific subtle energy changes in the ambient field, cognate to the bioenergy spectrum of the healing traditional, complementary methods.

Long-term application in practice and numerous diagnostic methods, such as the PIP (Dr H. Oldfield) and GDV (Dr. Korotkov) technologies, have confirmed particularly positive effects on all the biostructures. Such an impression is confirmed by the **Lotus** and **Onix** diagnostic equipment from St. Petersburg, by which, through the ECG diagram obtained by analyzing the

dynamics of heart rhythms, a series of physiological, psychological, and energy parameters are established. The same is a **part of our ongoing methodology** for checking of the psychophysical condition and its changes.

The most important positive effects of non-Hertzian scalar fields of Tesla Scalar equipment are:

- * Purification of the living and working space environment by considerable reduction of the impact of harmful radiation of electromagnetic type, EM smog, as well as of geopathogenic radiation;
- * Harmonization of multilayered energy structures of the living creatures with the cosmic oscillations and balancing of physical-energy-informational entirety of bioorganisms;
- * Revitalization of the tissue on the cellular level by regulation of subtle-energy flows that trigger natural self-healing mechanisms;
- * Help in preservation of a healthy biosphere by a beneficial influence on the water, flora, and fauna, and ecosystems in general.

"Bearing in mind the experiments carried out and by what the EDQ Model indicates to us - Intelligent ether energies, although sensually inaccessible to us and hardly measurable (for the time being), are still a part of our Reality and Tesla technologies will, most likely, be the basis of the state-of-the art 21-century technologies." Goran Marjanovic, BSc, the author of the EDQ model and Tesla Scalar products.

Tesla Scalar

"The whole universe is alive," Tesla said, seeing the orderliness of Unity, each thread of existence of which is connected with the entirety by the original pattern of creation, bearing in the heart the imprint of the primordial origin the fractal of which it is.

Tesla Scalar

Harmonizing oscillations

"... all perceptible matter comes from a primary substance, or tenuity beyond conception, filling all space, the Akasha or luminiferous ether, which is acted upon by the life giving Prana or creative force, calling into existence, in never ending cycles all things and phenomena. The primary substance, thrown into infinitesimal whirls of prodigious velocity, becomes gross matter; the force subsiding, the motion ceases and matter disappears, reverting to the primary substance.", N.Tesla, Man's great achievement, 1907.
